Won first honors at Paris in competition with all the choicest new roses of Europe.

The flowers are large, double, of fine form, and very fragrant. It is one of the most prominent sorts at the Portland Rose Show.

Viscountess Folkstone—Flowers borne on strong stems, with thick foliage; color delicately tinted flesh, almost white, with beautiful satin finish; one of the most beautiful varieties in cultivation; should be in every collection.

White Killarney—This elegant new rose first made its appearance in a well-known New England nursery, where it sported from that famous Irish Rose, Killarney, now grown more extensively for cut flowers than any other variety. However, we have found the new visitor far superior to its parent as regards vigor, size of flower and ability to resist disease.

White Maman Cochet—Has all the good qualities of Maman Cochet, but pure white, equally large and fragrant, hardy and productive. One of the very best white ever-blooming roses for bedding, flowering all season long and until late in the Fall.

TREE or STANDARD ROSE

As can be seen by the accompanying cut, Tree or Standard Roses are stately objects for lawn or for interspersing among other plants in the hardy border. They are produced by grafting buds or eyes of various sorts upon stout canes of a wild rose. By cultivating several seasons, they produce large heads of growth and bloom quite profusely as bush roses. In fact, many sorts produce finer flowers upon standards than on ground roots. These roses lend themselves handsomely to planting in rows along walks or fences. Our stock this year has extra heavy heads, standing 4 to 5 feet from the ground. We grow only a few of the best varieties in this class. Being quite bulky and heavy, these roses must be forwarded by express. We offer the following fine sorts:

HARDY FLOWERING VINES

Hardy flowering vines are very useful in so many ways it is not to be wondered at that the demand for the more attractive ones is very large. For trailing over arbors or porches as shade producers, for screening otherwise unsightly objects and for decorative purposes generally, hardy vines are very desirable. We supply only strong, two and three-year-old roots of these vines, which must be sent by express, being too large to mail.

AKEBIA

Quinata—Hardy fast growing Japanese vine with handsome foliage and producing flowers in large clusters of chocolate purple color, possessing sweet perfume. Fine for trellises and verandas. 75 cents each.

AMPHELOPSIS

Quinquefolia (Virginia Creeper)—A native vine of rapid growth with large luxuriant foliage, which in the Autumn takes on the most gorgeous coloring. Two-year-old plants 60 cents each.

Veitchi (Boston Ivy)—This is one of the finest climbers we have for covering walls, as it clings firmly to the smoothest surface covering it smoothly with overlapping foliage giving it the appearance of being shingled with green leaves. The color is a fresh deep green in Summer, changing to the brightest shade of crimson and yellow in Autumn. It is hardy and becomes more popular every year. Two-year-old plants 60 cents each.

ARISTOLOCHIA

JAPANESE CHRYSANTHEMUMS

The Japanese Chrysanthemum is without doubt the finest Fall blooming plant we have and has been aptly named "Queen of Autumn." Immense strides have been made of late years in hybridization, and the latest novelties are remarkable object lessons of the potency of cross breeding. No family of plants present such a wide range of colors or more diversified forms. Nor does any respond more readily to liberal cultivation than the Chrysanthemum. In fact, they require considerable attention to give best results.
